

Management of the Edentulous Patient with Implants:
The All-on-4™ Concept, Teeth in a Day
An Evening with Dr. Ali Alijanian

To Benefit

California Dental Association Foundation

The CDA Foundation was formed as the philanthropic affiliate of the California Dental Association in 2001 with the mission to improve the oral health of Californians by supporting the dental health profession and its efforts to increase access to care for the state's most underserved people. Our mission can only be accomplished by continually linking dentistry with community needs. By working with experts in the dental profession, private business, academic institutions and government, the CDA Foundation produces programs that increase access to care, promote prevention education and intervention, advance health policy research and build a sustainable oral health workforce. We are pleased to state that our success in reaching underserved people through programs, grants, scholarships and training is fueling the momentum for even more. We are creating smiles and changing lives.

This year, the CDA Foundation celebrates its tenth year of supporting oral health. For the past decade, the CDA Foundation has provided funding for essential areas in oral health, including community programs and training, fluoridation, student assistance, research and education. In 2011 alone, nearly \$6.5 million in dental services have been provided and almost 38,000 individuals have been served through grants.

This is our mission statement:

The mission of the CDA Foundation is to improve the oral health of all Californians by supporting the dental profession and its efforts to meet community needs.

As the philanthropic affiliate of the California Dental Association, the CDA Foundation is making a real difference in the lives of tens of thousands of families by providing dental care to underserved children, the elderly, and working poor.

The good works of the CDA Foundation is building a 'storehouse of goodwill' for dentists in the community and the legislature by implementing long-term programs and solutions that help make dental care available for underserved children and their families statewide.

All donations and corporate sponsorship proceeds from this event will be donated to benefit the CDA Foundation.

Management of the Edentulous Patient with Implants: The All-on-4™ Concept, Teeth in a Day

Recent Advances for the Implant Patient

We are practicing in very exciting times. Implant dentistry has progressed in leaps and bounds over the past decade. The current techniques allow us to offer patients less invasive procedures with a higher level of predictability. Now, we are able to offer patients with severely resorbed jaws and patients who do not want to transition into dentures innovative new solutions. In the case of the edentulous patient, they have a fear of complex surgeries such as major bone grafts as well as the length of treatment. In the case of the dentate patient who is faced with losing all their teeth, they are concerned and sometimes unwilling to transition into a removable prosthesis. We will demonstrate how we can overcome these barriers and offer them a fixed implant retained prosthesis with no grafting and no transition into a denture. The *All-on-4™* technique, whether using the tilted implant concept or the zygomatic implant concept, offers a predictable and cost effective treatment option for these patients. These techniques have been implemented by some companies and are being advertised heavily in our local areas. This presentation will give you the necessary information to begin implementing these techniques in your offices and care for the patients who are seeking these treatment options.

- Criteria for Patient Selection
- Treatment Planning Protocol
- Prosthetic Treatment Options
- *All-on-4™* as a Business
- Step by Step Preoperative and Surgical Protocol
- Immediate Implant Placement
- Immediate Loading
- Denture Conversion Technique

Meet the Doctor

Ali Alijanian, D.D.S.

Dr. Alijanian is one of the few surgeons trained in graftless procedures including placement of the zygomatic implants. He is an instructor at the Surgical Implant Training Program at Alameda County Medical Center / Highland General Hospital. He has published numerous articles in the fields of anesthesia, dental implants, and reconstructive surgery. Dr. Alijanian lectures and offers continuing education to his colleagues in the State of California. He also offers an Implant course at the University of the Pacific – Arthur A. Dugoni, School of Dentistry. Dr. Alijanian is a Diplomate of the American Board of Oral & Maxillofacial Surgery, a Diplomate of the National Dental Board of Anesthesiology, and a fellow of the American College of Oral and Maxillofacial Surgeons. He served as the President of the Sadi Fontaine

Academy and President of the Contra Costa Dental Society. He has been featured on KRON 4 and NBC discussing updates in implant dentistry.

In addition to his private practice, he is the Director of both the Partnership Study Club and Spear Study Club, groups dedicated to advanced dental education. Dr. Alijanian continues to keep updated with the newest advances in oral and maxillofacial surgery. Dr. Alijanian is an accomplished Oral and Maxillofacial Surgeon dedicated to caring for people in the greater Bay Area. He is committed to philanthropic events within his community and continues to encourage his colleagues to participate.

In the 2008 charity lecture, we were able to donate \$14,000.00 to the CDA Foundation and Irwin Lebow Children's Foundation. With your continued support, we hope to have another great event!
