

Healthcare for the Homeless

Before

After

Hello,

Just to let you know a little bit about my past eleven years because this is when the change in my life occurred. I redirected my life to Jesus. I went into recovery at the Bay Area Rescue Mission in 2002. I completed the program and graduated in 2003. After that I was asked to do an apprenticeship by the director of Men's Ministry. I accepted and was appointed head of security. At the end of my apprenticeship I was hired by the Bay Area Rescue Mission. I worked at the Bay Area Rescue Mission until I met and married my wife. I just recently went through a divorce after being married for eight years.

I have been clean and sober for more that eleven years and I currently reside at the West County Interim Housing Program (the Brookside Shelter), I attend the Hilltop Community Church and my spirituality is key in my life. I feel getting this dental work done, will be a great benefit and really help my self-esteem. I consider myself to be a people person and like to smile. With the condition of my mouth I feel it keeps me from smiling and dealing with people in the manner I would like to. It would also allow me to have a healthy mouth and eat the foods I enjoy.

Thank you,
Darrell

P.S. I really appreciate that you will consider me for this gift. Once again, thank you.

We would like to thank the people who have chosen to make a difference in Darrell's life. Thank you!
